EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Crichton on April 28, 2006.

The application has been amended as follows:

In the CLAIMS:

Claim 1, line 6, after "cavity", the phrase – , wherein the nozzle comprises a valve body and tip, and after injection, the nozzle is retracted and the tip closes the mold cavity—has been inserted.

Claim 21, line 5, after "cavity", the phrase – , wherein the nozzle comprises a valve body and tip, and after injection, the nozzle is retracted and the tip closes the mold cavity—has been inserted.

The following is an examiner's statement of reasons for allowance: it is deemed novel and unobvious over the prior art of record to so perform a method of making a dosage form as claimed, including injecting through a nozzle that moves for injection and then retracts away from the mold cavity to close the mold cavity, a flowable material containing a first medicant into the mold cavity, wherein the nozzle comprises a valve body and tip, and after injection, the nozzle is retracted and the tip closes the mold

cavity, and hardening by cooling the mold cavity into a solid dosage form having a shape substantially the same as the mold cavity, wherein all the material injected becomes part of the solid dosage form, as claimed in claim 1; the method further including a pharmaceutical active ingredient as claimed in claim 21.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
